

Edited extract from Unified Screening Assessment 2015

Air Quality Monitoring Data: May 2015

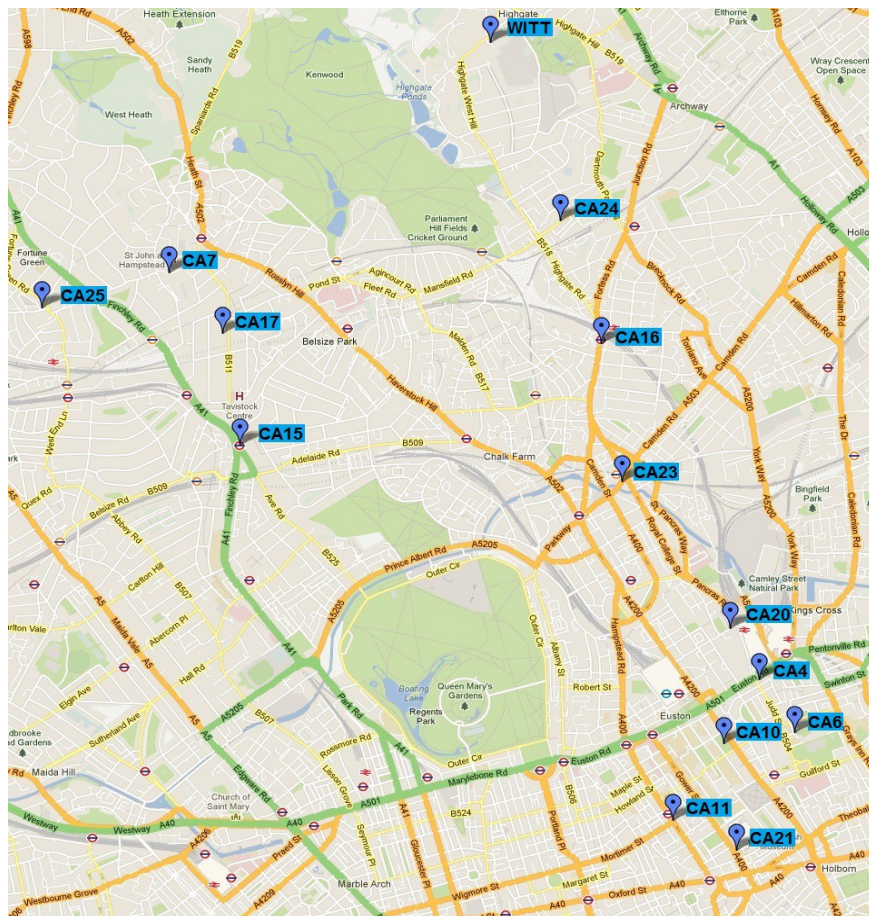

The following tables represent monitoring data from Camden's diffusion tube monitoring network and its automatic monitoring stations. This data is being provided to Defra as part of Camden's statutory duties as an Air Quality Management Area. The data for 2014 has not yet been ratified by Defra and therefore is not currently publically available; as such figures for 2014 should be read as provisional and subject to change.

The data in this document represents Camden's monitored air quality levels. For more information on the data collected and how it compares to European emission targets, please visit the relevant page of the Camden website ([here](#)).
